

American College Of Traditional Chinese Medicine

Students have the option of completing one of their Clinic Observation II (ACM5351, ACM5452) shifts by participating in the ACTCM Preceptorship Program. Students who choose this option will complete all aspects of the Clinic Observation II course under the supervision of a licensed practitioner who has been approved by the administration as an ACTCM Preceptor. Students may encourage licensed practitioners who meet the minimum requirements to apply for participation in the program. These preceptors may work in various clinics and settings in California. Students must complete the 60 hours with their preceptor and submit the appropriate documentation to the Academic Associate Dean verifying their participation by the end of the second week of the semester following the completion of their preceptor hours. The preceptee (student) must register for Observation II in the semester in which they plan to complete their preceptor hours. Submit this approved agreement to the Registrar to register for your preceptor shift.

Student Name: _____

Practitioner Name: _____

Term of Participation: _____

I agree to participation in the Preceptorship Program as described above. I understand I will register for Observation II (ACM5351, ACM5452) credits with ACTCM during the term I wish to participate in order to receive course credit.
